ACOUSTIC MATERIALS BUILT FOR BETTER SOUND

Carefully selected materials that absorb, diffuse and control sound for balanced acoustics and lasting performance.

FABRIC PANELING

High-performance fabric wrapped panels that absorb mid to high frequencies, reduce echo and enhance speech clarity.

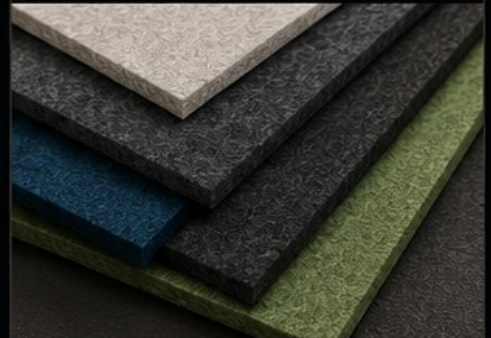

WOODEN SLATS

Timeless wooden slat panels that diffuse sound, reduce flutter echo and add warmth and elegance to any space.

PET PANELS

Sustainable PET acoustic panels made from recycled materials that deliver excellent sound absorption and durability.

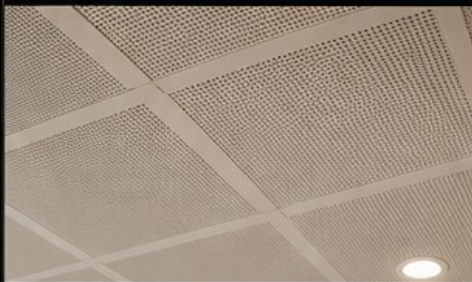

ACOUSTIC CARPET

Specially designed carpets that absorb impact noise, control reverberation and improve overall acoustic comfort.

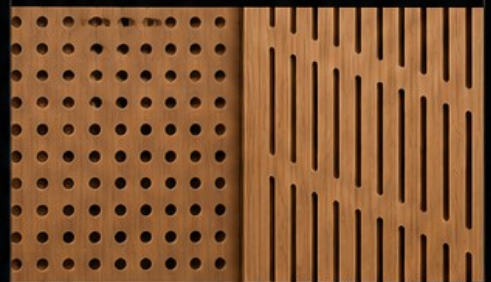

ACOUSTIC CEILING GRID

Acoustic ceiling tiles and grids that absorb sound, reduce noise reflection and create a balanced acoustic environment.

PERFORATED & SLOT PANELS

Engineered panels with precise perforations or slots that control sound reflections and provide a refined aesthetic finish.

OPTIMAL
SOUND CONTROL

DURABLE &
LONG LASTING
